This book is yours to keep and treasure. Take it away and enjoy as you explore together.

Nature Discovery

I Spy Nature

What can you find?
Once upon a time,
we visited the Nature Discovery gallery at Manchester Museum and discovered the Den, the Meadow, the Treetops and the Forest.

We used our paper binoculars to look high and low and to see what we could find.

We looked for animals that fly, animals that hop, animals that jump and animals that crawl.

Some of the animals we saw were very, very BIG and others were very, very small.

Some of the animals we knew and others we had not met before.

We listened carefully to hear the buzz of bees and wondered what sounds the other animals might make?

And then together we continued to explore.
